EDUCATION

Technical University of Civil Engineering Bucharest **Bucharest, Romania**
Bachelor's Degree in Automation and Applied Informatics *Expected Graduation, June 2026*

- **Academic Focus:** Modeling, Simulation and Intelligent Systems
- **Related Coursework:** Data Structures & Algorithms, Objects & Design, Artificial Intelligence, Object-Oriented Programming, Statistics & Applications

EXPERIENCE

Soft Tehnica **Bucharest, Romania**
Software Development Engineering Intern *June 2025 – Aug 2025*

- Built and deployed full-stack web features using Laravel, JavaScript, PHP, MySQL, and MVC architecture
- Developed secure authentication flows and role-based access control using Laravel Breeze
- Designed database schemas and optimized SQL queries to improve application performance
- Implemented RESTful routes and backend logic to support dynamic frontend interactions
- Debugged and refactored legacy code to enhance maintainability and scalability
- Used Git for version control and independent feature development throughout the project lifecycle

PROJECTS

Tracknity **Bucharest, Romania**
Independent Project *Jun 2025 – Jan 2026*

- Implemented a real-time fleet tracking web application using Laravel Breeze (PHP) and JavaScript, enabling live vehicle monitoring on an interactive map interface
- Developed a local AI-powered live chat feature to provide automated user assistance and support
- Created a GPS-based live tracking functionality, integrating dynamic map rendering and real-time position updates
- Designed and managed the backend architecture following MVC principles, handling vehicle data processing and tracking logic
- Implemented authentication, role-based access control, and secure session management using Laravel Breeze
- Designed and optimized MySQL database schemas to support tracking data and user accounts
- Applied both client-side and server-side validation to ensure data integrity and platform security
- Used Git for version control and coordinated development processes as project lead

TechiFy **Bucharest, Romania**
Independent Project *Jan 2026 – Feb 2026*

- Developed a web application using Laravel (PHP) and JavaScript to track inventory, revenue, and expenses for a small PC parts reselling business
- Developed inventory management features including item addition, editing, deletion, stock status monitoring, and search/filter capabilities.
- Implemented sales processing functionality that automatically updates inventory, records transactions, and calculates profit margins per item and per period
- Designed and optimized MySQL database schemas for products, purchases, sales, expenses, and cashflow reporting
- Created dashboard views and financial summaries (revenue, expenses, net profit) with time-based filtering for business insights

SKILLS

Programming: Java (Intermediate), Python (Intermediate), JavaScript, PHP, C++, C, SQL, MATLAB, HTML/CSS
Technical: Data Structures and Algorithms, Data Mining, Machine Learning, Artificial Intelligence
Platforms: Linux, Windows
Languages: Romanian (Native), English (Advanced), French (Beginner)
